

Production: Lighting Technician*

Position Type: Part-Time | Supervisor: **Service Producer/ Creative Director**

JOB OVERVIEW:

The Lighting Technician is responsible for setting up, operating, and maintaining the lighting equipment used in church services and events. Working closely with the Worship Pastor and Production Crew, this role ensures that the lighting design enhances the overall worship experience for guests.

RESPONSIBILITIES & DUTIES:

- Set up and operate lighting equipment for church services, events, and special productions.
- Collaborate with the Worship Pastor to develop creative lighting designs that align with the vision and theme of each service or event.
- Program lighting consoles to create various lighting effects, color schemes, and intensities.
- Maintain and troubleshoot lighting equipment, including fixtures, dimmers, control consoles, and cables.
- Coordinate with other production team members to ensure smooth execution of all technical aspects during rehearsals and live productions.
- Assist in the installation and dismantling of lighting equipment as needed.
- Stay updated on industry trends and advancements in lighting technology to continually improve the quality of the church's lighting designs.

SKILLS & QUALIFICATIONS:

- Previous experience as a Lighting Technician in a church or live event production setting is preferred. On-the-job training will be provided for motivated candidates
- Strong knowledge of lighting principles, techniques, and equipment
- Proficiency in operating our lighting consoles (LightKey)
- Familiarity with DMX control systems. On-the-job training will be provided.

- Ability to work effectively in a fast-paced, collaborative environment
- Excellent problem-solving skills and attention to detail
- Flexibility to work evenings, weekends, and holidays as required
